

BANKS

Bankers are users who want to finance energy efficiency projects in buildings.

Use the platform to:

- Promote financing products tailored to energy efficiency projects (e.g., green loans, mortgages)
- Specify eligible building types, investment ranges, and supported technologies
- Receive notifications when Building Owners or Public Bodies express interest in your financing tools
- Evaluate pre-qualified projects with structured data on CAPEX, IRR, payback, and KPIs
- Set matchmaking filters to prioritize projects that meet your investment criteria
- Access user-validated project pipelines to identify scalable investment opportunities
- Monitor engagement with your products and track financed project performance
