

Where does your building fit?

Platform pilots overview

The ENERGATE pilot partners, including Greenesco, LDK Consultants, Commuty, Enerbrain, and the Riga Planning Region, demonstrate the platform's efficiency by defining use cases, engaging stakeholders, and registering building projects that seek financing. These pilots focus on energy efficiency renovation projects in various building types: Greece targets public, residential and non residential buildings, Italy and France private non-residential, Spain residential despite market challenges, and Latvia public service buildings. The goal is to showcase the platform's support for energy efficiency projects. The first pilot buildings are now on the platform for reference and validation of its functionalities.

Types of buildings

Buildings per type and country

| | | Greece | Spain | Italy | France | Latvia |
|------------------|-------------|--------|-------|-------|--------|--------|
| Pilot typology 1 | Residential | ✓ | ✓ | | | |
| Pilot typology 2 | Office | ✓ | | | | |
| Pilot typology 3 | Industrial | ✓ | | ✓ | | |
| Pilot typology 4 | Hospital | | | | ✓ | |
| Pilot typology 5 | Retail | ✓ | | | ✓ | |
| Pilot typology 6 | Public | | | | | ✓ |
